

HOW YOU CAN DONATE

Become a Friend of NSARDA by signing up on our website www.nsarda.org.uk and support NSARDA year on year.

Make a one-off or regular donation via our online donation page which you can find at nsarda.enthouse.com

Or via our website nsarda.org.uk/how-you-can-help-nsarda/donate/

HANDLER		DOG	
Waterproofs	£500	Fluorescent Search Jacket	£90
Head Torch	£100+	Warm Coat	£90
Radio	£500	Helicopter Winch Harness	£200
First Responder Bag	£500	Dog GPS	£120
Helmet	£200	Night Lights	£15
First Aid Kit	£100	Long Lines	£35
Snow Shovel	£70	Safety Lines	£100
GPS Tracker	£300	Cool Coat	£100
Compass	£50	Dog First Aid Kit	£100
Emergency Shelter	£80		

Your donations help us to train the dogs and purchase the vital equipment we need to carry on supporting the emergency services. Specialist equipment for both dog and handler are shown in the table below.

NSARDA receives no guaranteed funding. We rely purely on the brilliance of our dogs, the commitment of our volunteers and the generous donations made by the general public

FUNDING

REGIONAL ASSOCIATIONS

The National Search and Rescue Dog Association is an umbrella organisation representing Search Dog Associations located in the UK, Isle of Man and Eire.

OUR SUPPORTERS

Join our ever-increasing Friends of NSARDA at www.nsarda.org.uk or support us in person by becoming a NSARDA “dogsbody”

ALWAYS ON CALL

The National Search and Rescue Dog Association (NSARDA) is an umbrella organisation representing Search Dog Associations in the UK, Isle of Man and Eire. NSARDA holds the standards by which search dogs are trained and qualified.

All of the NSARDA Associations are voluntary organisations that are called upon by the emergency services to assist in searching for, finding and rescuing vulnerable missing people.

People go missing in all types of terrain including the mountains and moorlands as well as lowland rural and urban areas. In fact people go missing almost anywhere you can imagine.

NSARDA Search Dogs are used to search for the many different types of missing people such as hill walkers, climbers, the elderly and confused persons that may be suffering from Alzheimer's and Dementia, those that are despondent, children, and sometimes victims of crime.

You will find NSARDA qualified dogs and handlers working with both Mountain Rescue and Lowland Rescue Teams or directly for the Police and other emergency services.

THE AIMS OF NSARDA

- Provide a single voice for Search & Rescue Dog organisations
- Raise public awareness of Search & Rescue Dogs
- Raise and maintain capabilities and standards of search dogs
- Raise money to fund delivery of our free-to-all-service
- Foster responsible dog ownership

OUR HISTORY

In 1964 Hamish MacInnes, leader of Glencoe Mountain Rescue Team, attended an International Red Cross Search Dog course in Switzerland. They were training and assessing avalanche search dogs and he immediately saw the potential for using dogs to search for lost walkers and climbers in the UK.

As things developed, NSARDA covered the whole of the UK, before it became devolved into Scottish, English and Welsh Associations in 1971. Further developments led to the modern day, with the current formation of regional associations.

OUR VOLUNTEERS

Our Volunteers have to be ready for anything. They never know what they may find, particularly as for many of the missing people it may already be too late. They give up their own time at all hours for people they've never met, showing an extraordinary level of commitment.

WHAT THEY DO

Search dogs are trained and qualified to find missing people by various means, including air scenting and trailing. Air scenting dogs work on both land and water. These are very efficient methods of searching large areas of land, bodies of water and routes. In ideal conditions a dog can pick up human scent from around 500 metres. It is calculated that a dog is equivalent to about 20 human searches in good conditions and many more in poor weather.

THE TRAINING

Before making the call out list, our incredible dogs and their handlers typically train for between 2 and 3 years, before undergoing an intensive 3 day assessment. They are re-assessed after 12 months and every 3 years to ensure they remain competent. All NSARDA qualified dogs are on 24 hour standby, all around the country, 365 days a year.

Fundamental to the training are "dog's bodies", a core of NSARDA helpers who hide and wait to be found by the dogs. This familiarises the dogs with the finding of an unknown human scent.

Our hero dogs then take one of three different paths.

Air scenting dogs

Using their natural hunting instinct, the dogs catch scent on the wind and track it to its source.

Scent discrimination/Trailing dogs

These dogs are trained to distinguish one scent from another. They are given a piece of the missing person's clothing and follow the scent from their last known location.

Water Search Dogs

These dogs search either search water margins on land or from a boat and pick up human scent emanating from the surface of the water.

DEPLOYMENT

Dog teams are quickly deployed to search areas where they can begin to search quickly. This may involve 4x4 vehicles or helicopters, particularly to remote or difficult to access areas. NSARDA dog teams are often found working with Mountain Rescue or Lowland Rescue teams.

THE DOG TEAM

A Search Dog Team usually comprises the Handler, the Dog and a Support or Navigator. Each member of the team is highly trained and qualified to perform their tasks. In essence the dog handler needs to ensure coverage of the area and to place the dogs nose in all the right places. The dog will range the area and follow the directions of the handler using their nose to locate human scent. The support / navigator will make sure the team covers the entire search area in order to complete their given search tasking. If a missing person is found the dog team will call in additional resources and provide initial first aid care until they arrive when an extraction can take place.
